Summary

Software Engineer with **5+ years of professional experience in backend development, Odoo & ERPNext/Frappe development, and product architecture**. Proven expertise in designing and building scalable applications from scratch using the Frappe Framework, including custom modules, reports, print formats, client and server-side scripting, and workflow automation. Extensive hands-on experience with **ERPNext versions v12 through v15 (including Nightly builds)**, along with end-to-end **ERP implementations and migrations** from Tally, Busy, QuickBooks, Odoo, and other legacy systems.

Strong background in **cloud and on-premise deployments**, including AWS, Google Cloud, and DigitalOcean, as well as Linux server management, Nginx configuration, SSL setup, and production rollouts. Experienced in integrating third-party platforms and APIs such as **Shopify, Indiamart, WhatsApp, Razorpay, Paytm, and Google services**. Demonstrated ability to lead teams, collaborate with cross-functional stakeholders, and deliver enterprise-grade solutions for **global clients across India and international markets**, with a strong focus on reliability, performance, and business impact.
